

Health and safety

Farm health and safety

During this presentation please think about:

- 1. Prevention:** How could we stop this from happening?
- 2. Compensation:** If this did happen what would be fair compensation?
- 3. Rehabilitation:** How would I get this person, my employee, relative, spouse, child, visitor or self back to work?

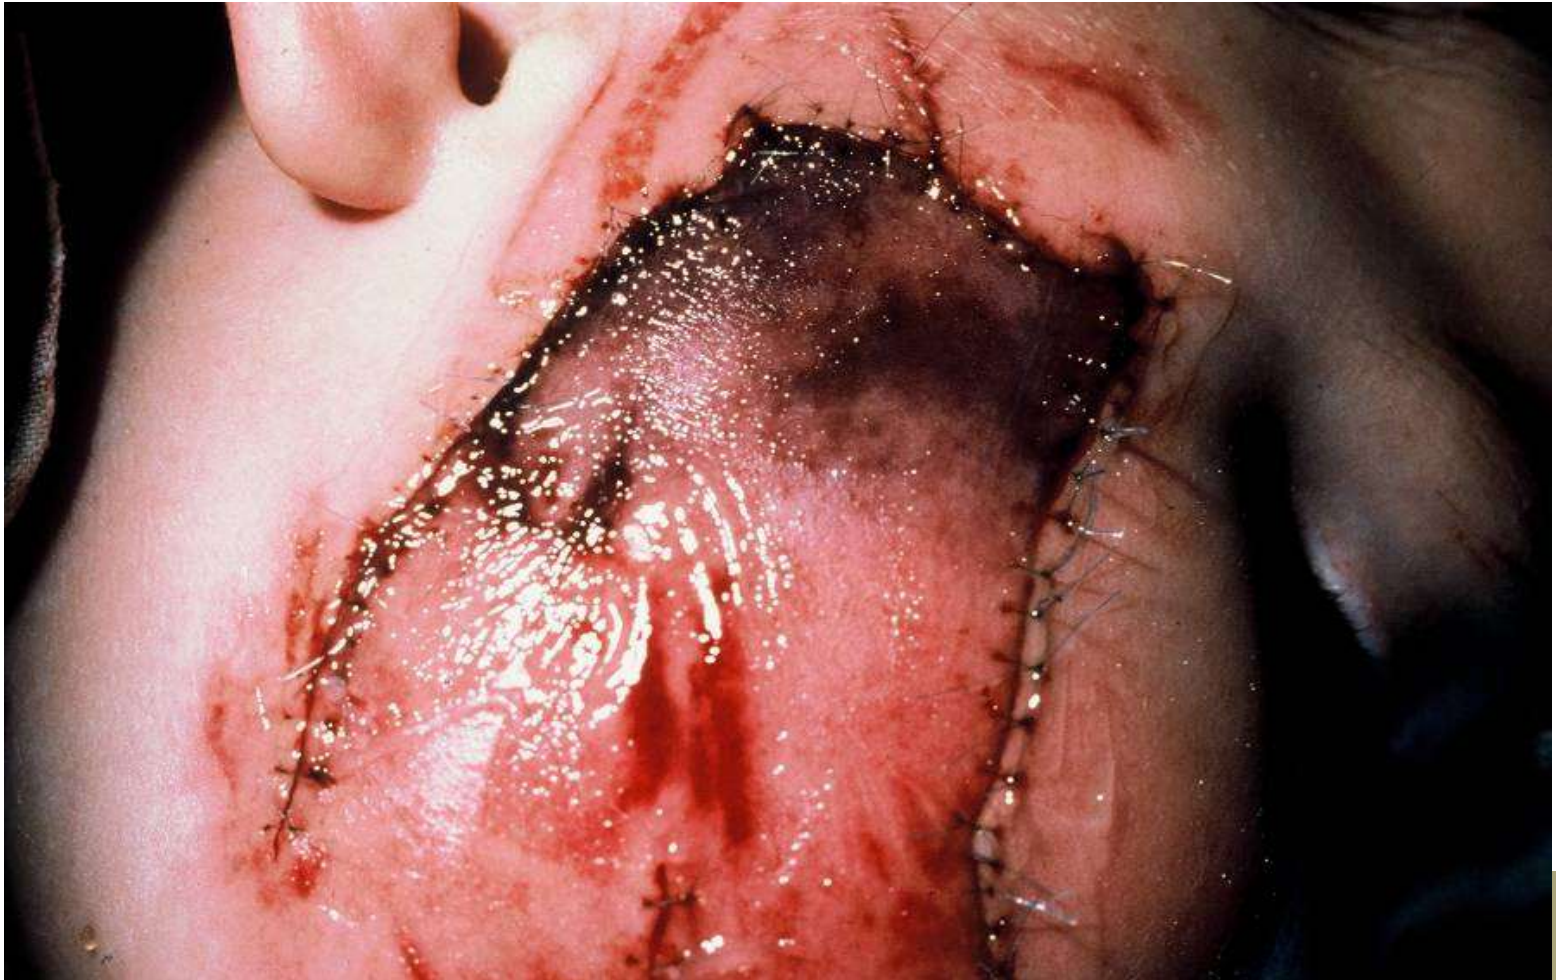

Slides following are:

- 1. Real photos of farm injuries**
- 2. Graphic**

Dog bite

Sutured dog bite

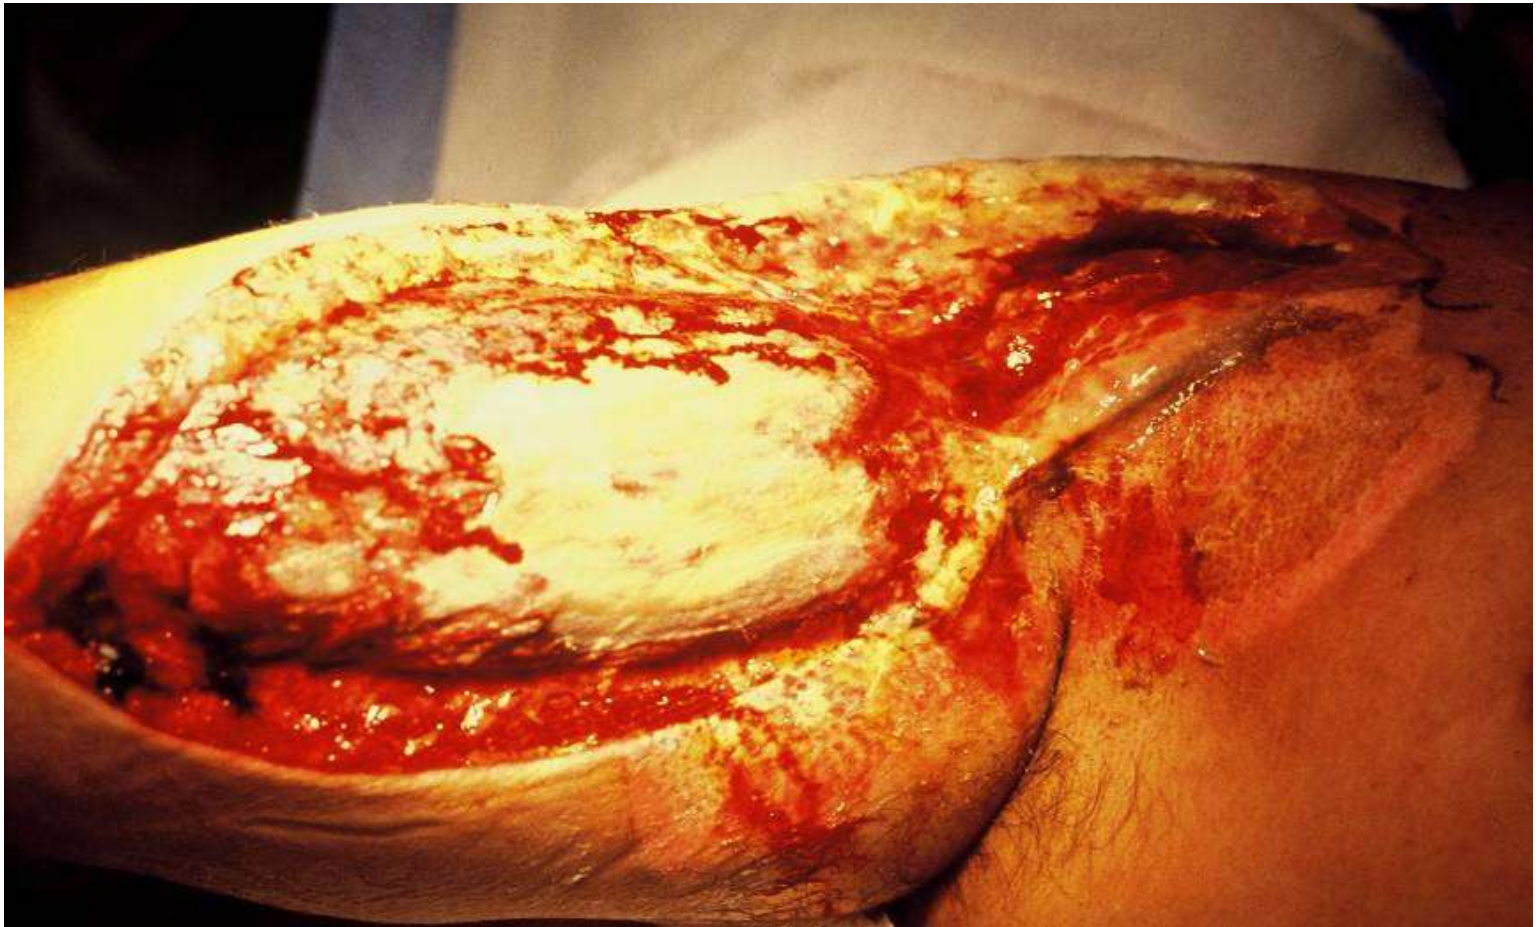

Dog bite

Log rolled on leg

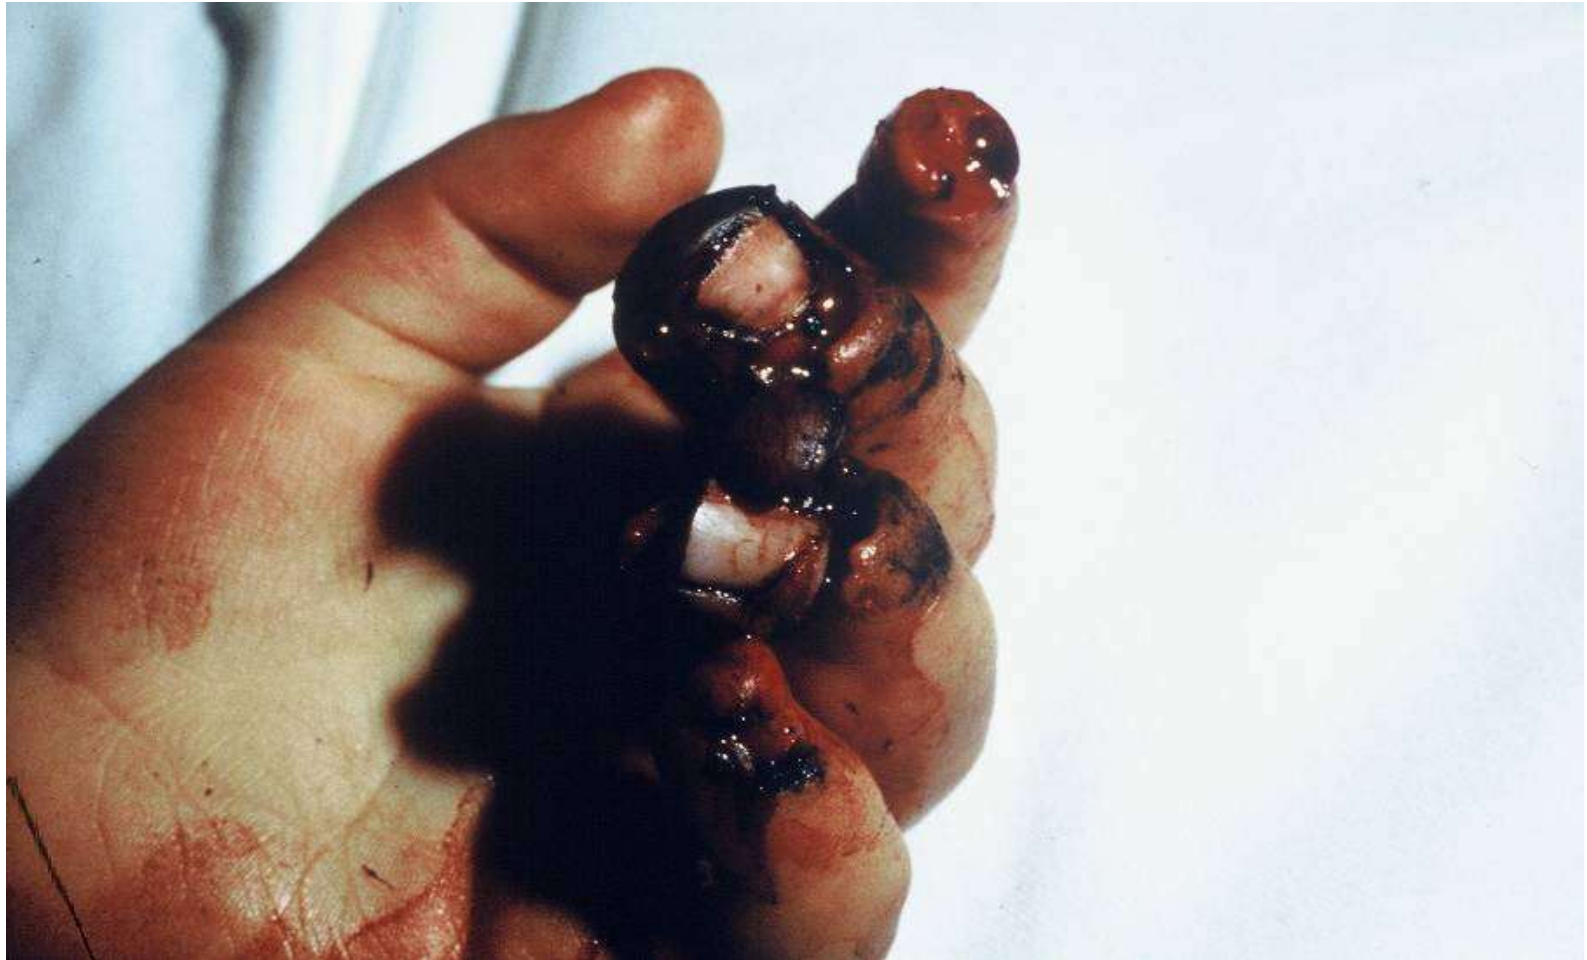

Auger – bicep muscle

Saddle injury

PTO injury

Dermatitis/allergy

Bicep rupture

Inguinal hernias

Ruptured hernia

Human worms

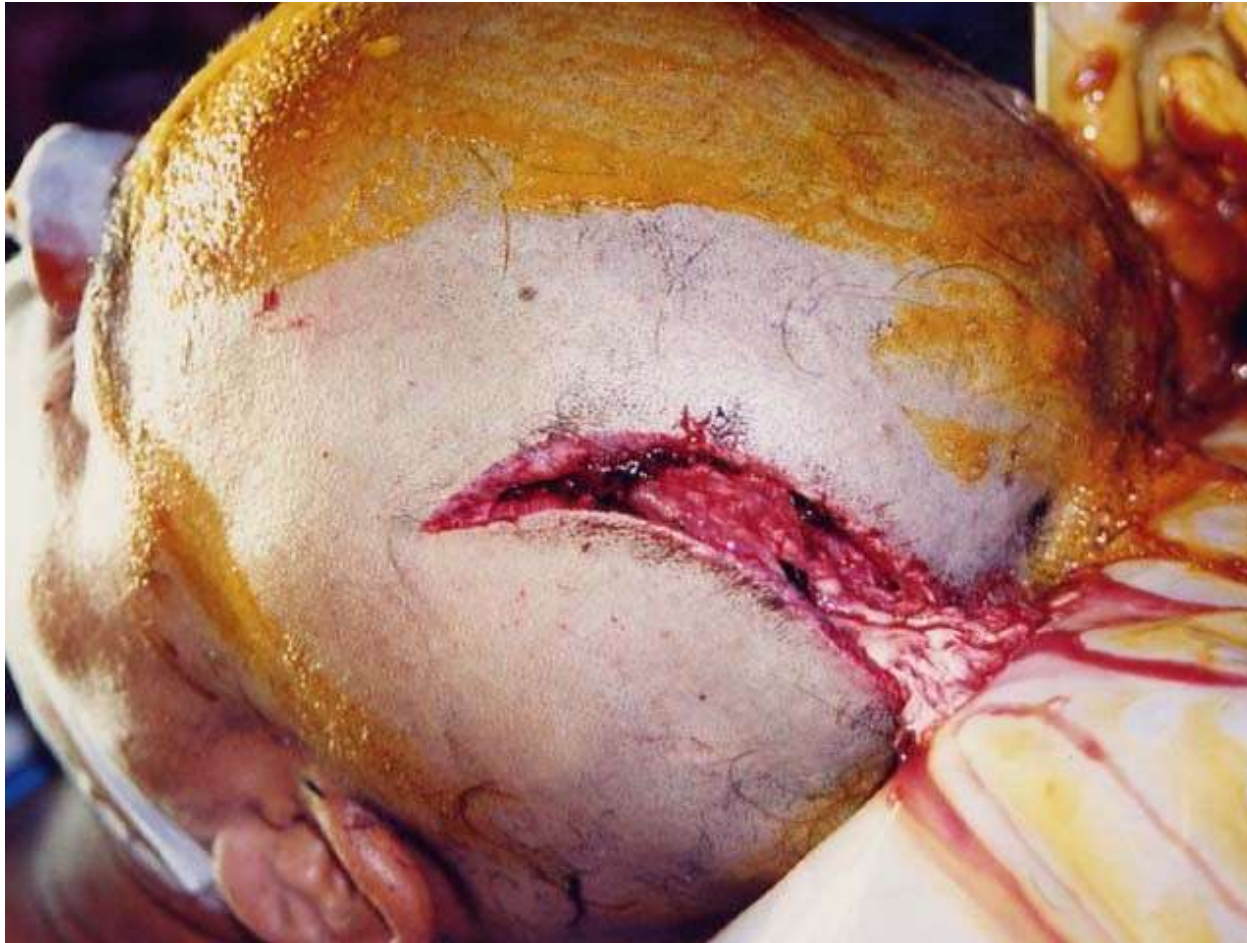

Vaccination injury

Head injury no helmet

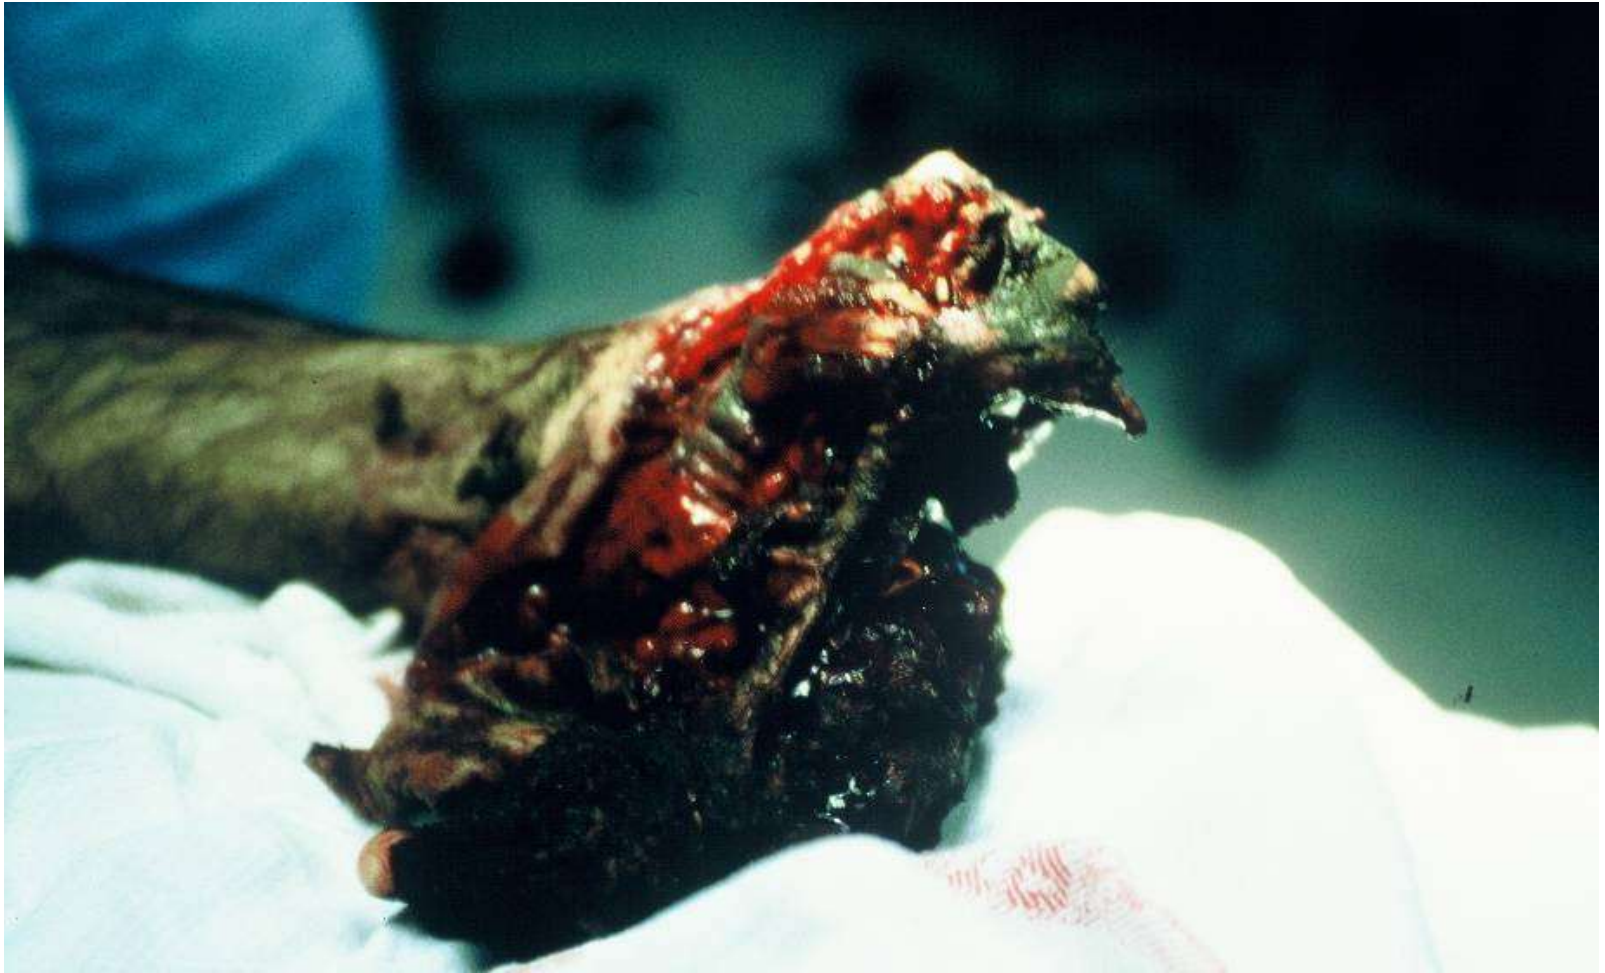

Source: [Trauma.Org](https://trauma.org) Image bank

Neck

Grader injury - foot

Falling from height

Finally if a farm injury occurs?

- Would you know what to do?

In your table groups discuss

- have you ever done a first aid course?
- are you confident with CPR?
- would you know what to do in an emergency?

Document your answers page 4.10 in your resource manual

In summary

- Farms are different - home and workplace
- Work Health and Safety Act 2012
 - responsibility of employers, employees, visitors

Take control

- Prevention, Identify Hazards and Act.
- Do a First Aid course or update

Remember – the things that matter are not usually things!
